ABOUT ME

The internet has always fascinated me. This drove my decision to, at the age of 24, return to college and change my career path.

Through my coursework and a hefty amount of independent study, I have gained a strong foundation in modern web technologies like React, SCSS, and Node.js. I am hoping to continue grow my skillset through the end of my education and beyond.

EXPERIENCE

Intern, Happy Code Club; Stamford, CT Summer & Fall 2020

As an Intern at Happy Code Club, I taught a wide variety of technology-related topics to students of all ages. Topics I taught included: Lua programming (Roblox Studio), Python programming, Virtual Reality programming (using a JavaScript library called A-Frame), and robotics.

IT Help Desk Intern, Dutchess Community College; Poughkeepsie, NY 2019-2020

During my time at the DCC Help Desk, I was responsible for providing technical support to students and faculty. This included the installation of network and desktop hardware. Additionally, I assisted in the Windows 7 to Windows 10 upgrade process by fixing various bugs and educating users.

Underwriting Assistant, Prime Specialty; Brewster, NY 2011-2019

My work as an Underwriting Assistant involved assisting General Liability Underwriters in their day-to-day work. This included data entry, managing correspondence, and general clerical work.

EDUCATION

Pace University, Pleasantville, New York — B.S. Information Technology, In Progress
